

## V200 GNSS RTK System

V200 GNSS RTK Receiver brings superior performance and high efficiency to support your fieldwork with reliable solutions. Its deployment of the advanced RTK engine and new-generation 9-axis IMU guarantees a 25% performance improvement even in the most demanding environments. Thus you can count on Hi-Target V200 for better productivity.

A leopard is shown in profile, running from left to right across a savanna landscape. The leopard's coat is a mix of black and brown spots on a tan background. The background consists of tall, dry grass and a hazy horizon under a clear sky. The overall scene conveys a sense of speed and precision, which is a metaphor for the high performance of the V200 GNSS RTK System.
