

LMX100™ GPR

LMX100™ GPR

LMX100™ GPR is a portable, lightweight, and easy-to-use ground penetrating radar system. It is designed for use in a variety of applications, including archaeology, geology, and construction. The system consists of a control unit and a probe. The control unit is mounted on a cart and has a display and buttons. The probe is connected to the control unit and is used to scan the ground. The system is easy to use and can be operated by a single person.

LMX100™ GPR Features

- Portable and lightweight
