

Artec Eva 3D Scanner

Artec Eva 3D Scanner is a professional-grade, non-contact, optical 3D scanner designed for capturing high-quality 3D models of objects. It features a built-in camera and a high-precision sensor, making it ideal for a wide range of applications, from product design to quality control. The scanner is easy to use and can be connected to a computer via USB or Ethernet. It is also compatible with Artec Studio software, which provides a powerful and intuitive interface for processing and visualizing 3D data.

Artec Eva 3D Scanner

Frame rate: 16 fps

Eva can capture 1,800 points per second with a resolution of 0.1 mm.

Resolution: 0.2 mm

Artec Eva 3D Scanner

Resolution: 1.3 Mpx
