Handheld 3D Laser Scanner
Model No. HSL01

YFMSCAN HSL01 is a handheld 3D laser scanner that can capture high-precision 3D point cloud data of various objects. It is suitable for various applications such as reverse engineering, quality inspection, and architectural modeling.

YFMSCAN HSL01 3D laser scanner can capture high-precision 3D point cloud data of various objects. It is suitable for various applications such as reverse engineering, quality inspection, and architectural modeling. The scanner has a range of 50m and a resolution of 60%.
