

JSY-S1 P laTer

B leaf I IntroDuction:

Throw smart and get twice the results with half the effort. JSY- S1 intelligent slow projection is composed of FPV camera, aviation aluminum alloy fuselage, slow fuselage, etc., and has a new fast disassembly interface, which can adapt to multiple types of flight platforms. Supports camera pitch control and can determine the drop position according to the image sent from the FPV camera. Built-in high-precision tension sensor accurately measures and displays the weight of the object. Auto-drop pull value can be preset and the pull value will be reached or exceeded.

T energetic P Parameters:

Size: 130*120*138.6mm

Weight: 860g

Operating temperature: -20°C~60°C

Storage temperature: -30°C~70°C

Maximum load: 6kg

D ROP function: intelligent, manual

V IDE resolution: 30W

P Pixel lens: f=3.6mm

Angle adjustment range: 0-90
