### ACCURACY:

#### STANDARD POSITION: INVERTED POSITION:

$\leq 0.0005 \text{ in./in. /}$   
 $\leq 0.5 \text{ mm/m / } \leq 0.029^\circ$

$\leq 0.00075 \text{ in./in. /}$   
 $\leq 0.75 \text{ mm/m / } \leq 0.043^\circ$

## PROFILE FEATURES

- **Heavy Profile Weight:** Ensures heavy usage and accidental abuse do not compromise the performance of the level
- **Two-Material End Caps:** protect the level from damage due drops
- **Single Measuring Surface:** Ensures highest accuracies and best user experience. Users are cued to which surface to use with a single milled surface.
- **Tension-Wedge Vial Mounting:** Self-compensates for temperature changes. There is no better method for mounting vials within a level profile.

## VIAL FEATURES

- **Greater Contrast:** Makes it easier to see the bubble, easier to determine its position, faster to take a level measurement
- **20% Magnification:** Makes its easier to see the bubble, easier to determine its position, faster to take a level measurement
- **Superior Fluid:** Ensures you can work in any environment without interruption or inconvenience
- **Anti-Static:** Bubble is unaffected by electricity
- **Extreme Temperature Range:** Bubble is unaffected by too cold or too hot temps
- **Anti-Shock Action:** Bubble retains its integrity or returns to its shape more readily

## LIMITED LIFETIME WARRANTY.
