

Kesonite Measuring Wheels

MADE OF KESONITE™

There are inherent vulnerabilities of die cast and metal spoked wheels. Everyday use requires that a wheel handle some rough treatment without dents and without bending.

Not all wheels are up to this. Our solution? Invent a new material. Kesonite is a strong, dense metal/resin composite. It holds its shape better than metal and it's stronger than a spoked or die cast wheel. The weight of the wheel makes it easier to use and more accurate on rough terrain.

Based on the design of the RR Series Large, a model with over 20 years of continuous improvement. Includes a NEW wheel design, material and safety reflector!

EASY-READ, MAGNIFIED COUNTER

5-digit, easy-read, magnified counter measures 9,999 feet, 11 inches (9,999.9 ft. on the engineers' models and 9,999.9 meters on metric).

NOW WITH A 3-PC. PISTOL GRIP HANDLE!

The same outstanding features, benefits and reliability of our previous 2-piece handle version with the added convenience of our *new 3-piece, pistol grip handle*. The twist locks have been replaced with quick-snap cam locks. The new handle telescopes down to a more compact 23 inches for ease of transport and more compact storage.

LIMITED LIFETIME WARRANTY.
