

# Wet Blasting Machine MSB-S5

Wet Blasting Cell with a rotating barrel

Wet-blasting cell that processes workpieces in the rotating barrel for high-mix low-volume production

A cell used for a thorough entire surface treatment of small part surfaces with complex shape. Implement up to wet-blasting followed by water rinse process. Applicable for various purposes such as cleaning, roughening and peeling.

## Feature

- By rotating a barrel, the work piece will be effectively stirred. Therefore an entire surface treatment to a complex shaped or sheet shaped work piece is applicable.
- By rinsing after blasting, abrasives will be washed off from the work piece and it prevents take out.
- Creating uniform surface by setting blasting time.

## Specification

<b>Size</b>	1400(W)×1365(D)×1830(H)mm
<b>Capacity</b>	max. volume : 5L max. weight : 10kg
<b>Processing time</b>	30~360s
<b>Gun</b>	3 / 8 in. Nozzle Compact Gun x 2
<b>Power supply</b>	AC200V, 50/60Hz, 3 phases
<b>Power consumption</b>	About 1.8kW (Total rated apparent power of all the equipment)
<b>Air supply pressure</b>	0.5MPa-0.7MPa
<b>Air consumption</b>	2.0m <sup>3</sup> /min (NTP at 0.4 MPa of preset blast air pressure)
<b>Option</b>	Sludge gathering unit
