

RD500 Plastic Water Pipe Locator

Plastic Water Pipe Locator

The RD500 is an effective device for finding and tracking buried plastic and concrete water pipes. The RD500 tracks plastic water pipes over a distance of up to 150 meters from the point of application of the pulse transmitter. This unit is low cost and quick and easy to use. Operators can learn how to use the RD500 to locate and track water pipes in just a few minutes.

- Easy Operation - Indicates that the meter deflects on the locator and picks up vibrations in the water pipe.

- Service will not be interrupted during searches
- Sound and visual trace indicator
- Can be used with variable output mechanical pulse transmitters and/or RD500-TX electronic pulse transmitters
- Tracing distances up to 150 meters
- Identify a maximum depth of 2 meters
- Optional RD500-TX Electronic Pulse Transmitter (for low-pressure household water)
- Includes all connection hoses and fittings for standpipes
