

PJK brand self-level rotating lasers provide quick self-level horizontally and vertically, providing accurate lines even at long distances. Included remote control allows one person to operate easily. The combination of functionality and ease of use makes it an ideal tool for all professionals and contractors who specialize in interior design and general construction.

## Musical Instrument Features

- ▶ The PJK-203G Green Beam offers excellent lines and work range, especially for outdoor work.
- ▶ 5-way scan width
- ▶ The laser beam can be rotated left and right
- ▶ Possible remote controls
- ▶ Shock Alert Function
- ▶ Can be used vertically or horizontally.
- ▶ Generate horizontal planes and vertical lines (lower point diodes) in horizontal applications
- ▶ Generate horizontal lines and vertical planes in vertical applications

## specification

Model number.	PJK-203	PJK-203G
Types of lasers	Red beam, 635nm	Green beam, 532nm
Laser class	Class II	Class III
Leveling accuracy	Horizontal: $\pm 20$ inches Vertical: $\pm 20$ inches	
Self-level range	$\pm 5^\circ$	
Measurement range	Diameter 500m (using laser detector)	
Rotation speed (4 levels)	0, 120, 300, 600r.P.M.	
Directional Scan Width (5 Levels)	0°, 10°, 45°, 90°, 180°	
Tilt adjustment range	$\pm 5^\circ$ (bidirectional)	
Falling Diode Accuracy	$\pm 1\text{mm}/1.5\text{m}$	
Remote control distance	Approx. 20m	
waterproof	IP54	
power supply	DC 4.8-6V (4 Ni-Hydrogen Rechargeable Batteries)	

Continuous usage time after full charge	Approximately 20 hours
Continuous usage time after full charge	160*160*185mm
Weight of musical instruments	2.0kg
Operating temperature	-10°C to 45°C (14°F~113°F)
