

## spot [Magnetic Locator](#)

### Metal and Magnetic Locators

Spot is a "next-generation stick locator" that offers precision and ease of use in a sophisticated, ergonomic, sophisticated package. If you want low cost and high accuracy, add Spot to your tracking location:

### Features

Environmental protection grade IP54

The waterproofing feature allows users to continue exploring iron metal objects, even in bad weather, under shallow snow or water.

### Optimized for searching for various objects

Spot has been optimized to locate a variety of iron objects, ranging from steel manhole covers to steel pipe fittings, marker pins and unexploded bullet investigations.

### Improved, refined ergonomic design

Spot is probably the latest version of the world's popular "Yellow Stick" magnetic locator. The concept overcomes the challenges of time, keeping ergonomics up to date, and one-handed and sturdy, environmentally friendly design allows Spot to work with and on behalf of the user, virtually wherever you are. It makes it possible.

### Weight less than 2 pounds

It's lightweight yet has heavy functionality!

## Performance parameters

Audio output	Frequency increases or decreases depending on the signal strength (gradient magnetic field strength). Range: 30-4000 Hz.
Depth detection	Maximum depth 18 (5.5m), object dependent
Low battery indicator	1/2 second beep every 13 seconds
Benefits	5 levels: Ultra-low (1), Low (2), Medium (3), High (4), Ultra-high (5) Audio: Audio beep progression correlated with gain settings (one beep for #1, two beep for #2, etc.)
volume	2 levels: Medium and Maximum
Input power	1 9V battery
Battery life	24 hours (intermittent use)
Operating temperature	-13°F to 140°F (-25°C to 60°C)
Overall length	42.3 inches (107.4cm)
Nominal sensor spacing	20 inches (50cm)
Weight	~2.0 lbs (0.9kg)
Waterproof and dustproof protection	Overall IP54 rated, waterproof from bottom tip up to 27 inches (58cm)
