

Torpedo Levels/Specialty Levels

Among the most popular levels we sell, short torpedo style levels are great for quick checks, and essential for some trades.

We offer a variety of specialty levels for a variety of uses.

LKTFM

This workhorse is as solid as any torpedo level on the market. Its V-groove and powerful magnet are features second only to the FOCUS-60 horizontal vial. There are also two FOCUS-20 vials for plumb and 45-degree readings.

LKTSF

The classic torpedo level with a FOCUS-20 vial.

LKTRF

A rounded edge on one side of this torpedo level enables a builder to get flush against walls that have a bevel in the corner. We have yet to find its equal.

LKGOM

A magnetic, portable torpedo level with belt clip. Perfect for quick checks and spot-on accuracy.

LKL3

Our 3-inch line torpedo level is perfect for keeping your wall, fence or grading level when attached to a taut string line.

LKTPRM

This is a no-frills, magnetic torpedo level.

MODEL	UPC (052837)	LENGTH	# VIALS	SPECIAL FEATURE
LKTFM	029037	9 in.	3	Die Cast
LKTRF	028931	9 in.	2
