

DT-23L Digital Theodolite

This series uses a unique spindle processing technology, and thanks to its flexible fuselage and track record of high-precision measurements, it has improved seismic resistance and water resistance, and is applied to civil engineering fields such as civil engineering, construction, water use, and shipbuilding.

◆ Absolute Angle Encoder System

A professional absolute encoding system that does not initialize when shutting down or opening a device.

◆ A single horizontal spindle crossing telescope, special design with horizontal and vertical spindles concentric.

A new design concept that combines high precision, stability and impact resistance. The internal spindle system has been improved to make the upper and lower laser points completely coaxial.

◆ **Laser centripetal, convenient for work.**

The device is simple and convenient to operate and adapt to a variety of working environments.

◆ **Excellent waterproofing function that won't bother you with bad weather.**

IP66 technology means you don't have to worry about working in bad environments.

specification

Model		DT-23L
telescope	image	upright
	magnification	30x
	Objective aperture	45mm
	Field of view	1 ° 30
	Shortest viewing distance	1.4m
	Stadia ratio	100
	Solved	3"
Angle measurement	Angle measurement mode	Absolute Angle Encoder System
	Minimum number	1", 5"
	Accuracy	2 inch / 5 inch
	Angle Units	Begu/Mil/Gon
compensation	Coverage	±3
Down Pramet	Down laser plastic	Optimal distance range from 0 to 5m
	Optical centripetal force	Multi: 3x Focus adjustment range: 0.3~ ∞
Base and body structure		Integration
Plate vial accuracy		30 inch / 2mm
Round vial accuracy		8/2mm
Working temperature		-twenty five °C ~ 50 °C
force	Battery model	Rechargeable lithium battery
	Voltage	3.7V
Weight of musical instruments		4.6 KG
volume		200 x 160 x 345 (mm)
